

**Mary Cass
Program Coordinator**

I joined the Center in April 2000. The position I am responsible for is Library/Information Resource and Continuing Education. The duties assigned have offered daily challenges and wonderful opportunities. The most rewarding challenge is coordinating a course and seeing it through to completion.

I guess the "fun" of my job has been talking to people from industry, and different walks of life who are just excited when I tell them there is an opening in a particular course and can take their registration. To hear the excitement in their voices, tells me that what the Center is doing must be great.

I look forward to coordinating the 2001 Course Catalog and seeing the cycle of a complete year of course offerings.
